"I am seventy-seven years old and one day, same years ago, I fell from a step-ladder, bruising my heel. In a few days I could not walk. I called in a doctor and inside of a week crysipelas set in. The doctor had not cured me of that when I was taken with eczema from head to foot. I was sick for aix months and what I suffered tongue could not tell. I could not sleep day or night because of that dreadful itching; when I did sleep it was from sheer exhaustion. I was one mass of irritation; it was even in my scalp. The doctor's medicine seemed to make me worse and I was almost out of my mind. I read of Cuticura and sent my wife to the druggist, who was a member of my lodge of Odd Fellows, for a set of the Cuticura Soap, Cuticura Ointment and Cuticura Resolvent. I used them persistently for twenty-four hours. That night I sleet like an infant, the first solld night's sleep I had had for six months. I was not afraid to use plenty of Cuticura Ointment and Cuticura Soap with hot water and in a week's time I was able to put on my ciothes again. In a month I was cured. From that day to this I cannot praise the Cuticura Remedies too highly. I may add that I have a very heavy head of hair which I owe to Cuticura. W. Harrison Smith, R. F.D. 2, Mt. Kisco, N. Where The President Is Resting,

The winter home of Charles P. Taft f Cincinnati, situated near Gregory, Texas, where President Taft plans to rest for a time on his country-wide trip, is said to be the finest ranch residence in the United States. It occupies a beautiful site, overlooking Corpus Christi Bay on one side and many miles of land belonging to his ranch and farm property upon the other sides. The res-idence is equipped with all modern con-veniences and is furnished with the view of affording the greatest possible com-

forts.

The Taft ranch, as it is called, is in many respects a remarkable property. It embraces a tract of 215,000 acres of land, nearly all of which is covered with a low growth of mesquite trees. The soil is rich and deep. It was not known until a few years ago that the ranch was situated in the agricultural belt of Texas. It had always been considered that that part of the Gulf region was too arid for the successful growing of crops. The management of the property F. Green for many years. After a careful investigation Mr. Green came to the conclusion that the land was suited for other things as well as for cattle graz-ing. He decided to try the experiment of growing cotton and other crops. He employed a practical farmer, and four nundred acres of the ranch land were cleared and put under the plow. A good crop of cotton was obtained the first year. The second year a much better six years ago and since then nearly two thousand acres have been converted into farms, and an additional nine thousand acres are being prepared for next year's crop. The results from these farming operations were so profitable that the attention of homeseekers from different parts of the country was atracted to the possibilities of the lands George W.
